Economic and Stock/Fixed Income Market Outlooks

Economic Outlook

Recent Reports

- May ICSC Chain Store "Same Store" Sales (-4.6%) fell. Wal-Mart will no longer be included in the comparable sales data.
- May Nonfarm Payrolls (-345K) fell less than expected and positive revisions (82K). Unemployment Rate (9.4%) higher than expected.

Upcoming Reports

- (6/11) May Advance Retail Sales (0.5% vs. -0.4%) & Sales Less Autos (0.2% vs. -0.5%).
- (6/16) May Housing Starts (480K vs. 458K, +4.8%) & Building Permits (500K vs. 498K, 0.4%).
- (6/16) May Industrial Production (-0.7% vs. -0.5%) & Capacity Utilization (68.5% vs. 69.1%).
- (6/16) May Producer Price Index (0.6% vs. 0.3%, -4.4% vs. -3.7% YOY) & PPI ex-Food & Energy (0.1% vs. 0.1%, 3.2% vs. 3.4% YOY).
- (6/17) May Consumer Price Index (0.3% vs. 0.0%, -0.9% vs. -0.7% YOY) & CPI ex-Food & Energy (0.1% vs. 0.3%, 1.8% vs. 1.9% YOY).

Longer-Term Outlook

- While we think that the policies and programs in place are likely to help move the economy towards recovery. But in our opinion, the impact of consumer and financial system deleveraging will almost certainly be a significant drag on economic growth over the next several years as saving and paying down debt replaces borrowing and spending. We also believe that no matter what the short-term outcome, there will be a price to pay down the road for the current policy actions—potentially in the form of a weaker dollar, higher inflation, higher interest rates and tax rates and, consequently, subpar economic growth and corporate profits, and lower stock market valuations.
- That being said, we are encouraged that the actions discussed above have taken the worst-case economic scenarios off the table. We are also encouraged by- the massive amounts of cash on the sidelines; earnings are (finally) being lowered to a level that reflects the weak economy; we are seeing glimmers of hope in some economic indicators. We are also encouraged by the improving signals in both equity & fixed markets.

Market Outlook

Equity Outlook

- Stocks continued their advance in May as large-caps & international outperformed. The S&P 500 finished up over 5% and is now positive for the year. It did appear to establish a trading range around 900 which we recently cited as the high-end of our fair value range. Smaller-cap indices for May were up only 1-3%. International performance was outstanding with EAFE up nearly 12% and emerging-markets over 15%.
- We believe we are in the midst of a period in which the environment for stock picking may be much better than the overall outlook for the market. Over the past few months, we have been able to find a lot of companies that meet our stringent criteria, and we remain confident that our disciplined investment approach will add a lot of value in this environment.

Fixed Income Outlook

- Fixed income has been performing as expected. Treasuries continue their year-to-date decline. Corporate & municipal bonds have outperformed but are now being impacted by the increasing rates. High-yield bonds, mostly funded from equities, continue to perform very well and were up over 7% for May.
- Tax-Exempt bonds hit resistance as Treasury rates moved higher but finished up 1% overall in May as longer-term maturities outperformed. This outperformance is attributable to the success of the Federally-subsidized taxable Build America Bonds (BAB). In May, KY's first BAB issue came in the form of Fayette County Schools. Valuations have returned to historical norms throughout the yield curve.

S&P 500 GICS Sector Performance and Recommended Sector Weightings

	% Total Return			Forward P/E Ratio	Actual Sector % Weightings	Forward Looking
	MTD	YTD	2008			CB&T Sector Emphasis
